

MATH 499 Feedback on your Project Report Introduction

1. Is the context of the research topic clear? If yes, what strategies does the writer use to create context? If not, how could the writer place the work in context of the broad area of mathematics/statistics?
2. Does the writer provide the appropriate technical background for the reader?
3. Are the specific research questions that the project will address clear?
4. Comment on the strengths of the introduction. Identify areas of weakness, and give suggestions for how to improve them.
