Getting Started with Enhanced WebAssign

First Steps:

A. Visit [http://webassign.net/login.html](http://webassign.net/login.html)

B. Enter the anonymous I.D. number as both your Username and Password

Note: Your anonymous I.D. number can be found on your personal BearTracks website.
After logging into BearTracks, click on the “My Class Schedule” link on the left hand side of your home screen.

View your Anonymous I.D. directly below your student I.D. number.
After logging in, you will see a notice that shows payment options (unless you registered with a multi-term access code for a previous course, in which case no additional payment is needed):

- Please note that you have a 2-week grace period before you need to enter your access code.
- When you have your access code card (bundled with the hard copy of the textbook, or available as a stand-alone purchase), enter your access code to ensure full access to all features of EWA.
- There is an option to purchase access online. We strongly recommend NOT using this option, since it is more expensive, especially since the amounts quoted are in USD.
Linking Accounts:

If you have already purchased access to WebAssign for a course using the Stewart Calculus or the Poole Algebra textbook, you can transfer your access to your new anonymous account.

A. After logging in, select the ‘My Options’ heading in the upper right-hand corner of your home page.
Select ‘Accounts’ from the pop-up window that appears.

A. Under the ‘Accounts’ tab, enter your Username and Password from your previous account
B. Enter your current password that is associated with your new anonymous account
C. Press the ‘Save’ button to link these accounts.

That’s it! You’ve successfully registered for Enhanced WebAssign!

The courses that have been set up for you by your instructor appear on your Enhanced WebAssign personalized Home page. If you have more than one course, simply select the course you want to work with from the pull-down menu.
