

## PIMS / AMI / GMU Seminar

Friday, February 3, 2011

3:00 p.m.

Room 5-207

Grant MacEwan University

(Downtown Campus)

### “Starting from the Heat Equation”

Professor Chi Kun Lin

Department of Applied Mathematics

National Chiao Tung University

#### Abstract

In this talk, I will review the history of partial differential equations and explain why and how the analysis play the most important role in this topic and partial differential equation is the main source of modern analysis. Some recent research topics will also be discussed.
